

For customs purposes only

This portable oxygen concentrator is prescribed by a physician, (see also: attached medical statement). The owner needs the device for his respiratory therapy. The device will be used during flight and will be carried as hand luggage.

An oxygen concentrator does not contain any oxygen or other hazardous substances. This device retrieves oxygen from the environment and concentrates this. This portable oxygen concentrator has dry batteries. This device is the property of Medidis B.V. and not meant for commercial purposes.
